

MONN[®]

CARRARA

SCULPTED TEXTURE WITH A WELCOMING GRANDEUR

TILES | CARRARA

Renowned through the ages, marble epitomizes timeless quality and unrivalled durability. Bringing a certain gravitas to a workspace, the MONN Carrara range of modular carpet tiles is both meticulously crafted and hardwearing. An understated design with subtle marbling, MONN Carrara uses stitch shift technology and Infinity yarn controls to create smooth gradients and sculpted loop-pile textures. This creates a dynamic, modern aesthetic.

The base range is available in neutral and cool tonalities, ranging from light grey to charcoal. Complimented by a splash of effect tiles, in bold crisp colours, to bring any floor into a contemporary realm. In addition, the excellent sound insulation and improved air quality, thanks to its dust-capturing capabilities, makes MONN Carrara highly suitable for commercial use. The solution-dyed MONN MSix™ fibre provides supreme durability and colour fastness, and ensures the longevity of your MONN Carrara floor.

Total Thickness	+/- 7.0 mm
Total Mass	+/- 3800 g/sqm
Static Control	Permanent
Green label plus	Pass

Normal tolerances apply

PERFORMANCE AND BENEFITS

A contemporary range of loose-lay tufted tiles with dynamic texture and smooth gradients. MONN Carrara's subtle shading creates sleek continuous stretches of floor, and complementing accent tiles can be used to delineate different zones or accentuate certain spaces.

The modular system also allows for easy replacement of individual tiles that may get damaged or worn over time. Compared to laminates and hard flooring systems, Carrara provides superior comfort and sound insulation, while also enhancing indoor air quality by trapping dust particles.

COLOUR SELECTION

Choosing the ideal colour for the required application, in terms of traffic and use, is important to ensure the long-term appearance and serviceability of your MONN Carrara floor. Consult our experienced sales representatives for advice on colour for your project.

INSTALLATION

Installation is critical in ensuring that the full potential of your MONN Carrara floor is realised. Fitting should be done by specialist contractors who install according to SANS 10186:2010. Installation guides are included with each box of MONN Carrara.

STAIN RESISTANCE

MONN Carrara is made from MSix™, a nylon 6 yarn extruded on-site and engineered to achieve maximum durability. This 100% solution-dyed nylon pile surface has superior colour fastness and stain resistance, ensuring MONN Carrara retains its original appearance for longer.

All MONN Carrara modules have been pre-washed, increasing resistance to traffic-related soiling.

MAINTENANCE

The effectiveness of any cleaning programme depends on careful supervision and the correct use of the right equipment. Consider a maintenance programme in accordance with SANS 10245:2008. Regular vacuuming and quick spill clean-up are the most effective and economical ways of maintaining your MONN Carrara floor. Comprehensive maintenance guides are readily available from our sales offices and online at www.monn.co.za.
